

# **Laptop Computer/Device Connection Information Sheet:**

**Laptop computer/device connections are on top of the Smart Station desk.**

- Connect your device using an HDMI cord to the connection plate on top of the desk – choose HDMI on the Control Panel to send the image to the display.
- Connect your device using a VGA cord to the connection plate on top of the desk – choose LAPTOP on the Control Panel to send the image to the display.

## **Note:**

- An HDMI and VGA with audio cable should be present in each smart station desk. If not, please inform IT.

## **Troubleshooting:**

- You may have to choose the FN key and LCD key (at the same time) on your laptop keyboard to send the image to the display.
- You may need to restart your device to activate the output port that you are plugged into.
